

## AR Overrules Ref PK

### Clip 2

The defender in the dark uniform challenges for the ball and is IMO unsuccessful with her attempt. The assistant referee should have a very good view on this challenge and rightfully so after the referee signals for a corner kick intervenes and corrects this decision directly after to result in a penalty kick. In these instances the referee can maybe wait a moment or two to see what information the AR might have as this was a challenge right on the goal line.
